  - Ceilings
  - Countertops
  - BSL hoods
  - Carts and other equipment
  - Gloves
- Products may be applied by:
  - Mopping
  - Wiping
  - Spraying

Life Sciences

An important aspect to any microbial control program is including rinsing or cleaning steps to control residues. Residues can lead to future contamination whether they are on the floor or product contact surfaces. When removing residues, it is important to use products that do not simply leave behind a different residue. The only ingredients in our Septihol Ethyl WFI Sterile Alcohol Solutions are ethanol, isopropanol, methanol and WFI. This makes Septihol Ethyl WFI Sterile Alcohol Solutions ideal for this important application since it easily evaporates and leaves extremely low residues. Our Technical Services team can help customize your contamination control program to take advantage of this excellent product.
